seq search

09/729,264 Welcher et al., 11/28/00

Please perform an olimoger search againts SEQ ID NOs: 1, 3 and 5.

If possible limit search to at least 16 nucleotides or more.

Thank you,

Brian Whiteman Remsen, 2D14 mail box 2C18 Patent Examiner - Art Unit 1635 United States Patent and Trademark Office (571) 272-0764 RE

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

was normalized. Library was constructed by Life Technologies, a
division of Invitrogen. This sequence belongs to sequence
10299.f. and it belongs to a clone representative of this cluster.
For more information about this cluster and the virtual cDNA, see

Library was constructed by Life Technologies, a division of
Invitrogen. This sequence belongs to sequence cluster 10299.f, and
it belongs to a clone representative of this cluster. For more
information about this cluster and the virtual cDNA, see
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            BX370210 Homo sapiens PLACENTA COT 25-NORMALIZED Homo sapiens CDNA clone CS0DI085YA24 5-PRIME, mRNA sequence.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              /clone="CSODIOSYA24"
